

5637 STEAM LOCOMOTIVE GROUP

15 July 2010

Modification List for Steam Boiler Assembly and Associated Fittings

No person is to carry out any modification to the steam boiler assembly and associated fittings unless that modification is fully described in writing with supporting drawings and has been approved in writing by the Insurance Company Boiler Inspector. Any modification being carried out must only be incorporated by a Competent Person. Any welding to be carried out, must be done by an Insurance Company approved welder with the proper skills and qualifications.

Before any Modifications are carried out it is essential that the persons involved have read and understood the following procedure:-

“Boiler Washout Plugs, Mudhole Doors and Live Steam Fittings – Fitting/Removal Procedure”

All modifications made must be recorded in the table below..
